### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-89,96-109, drawn to a system for implementing PKI based encryption of content over an electronic network where encryption services component generates key pair and providing certificate management services and PKI server operable to function at least one of a certificate authority and as a LDAP service provider which is classified in class 380, subclass 282.

Group II. Claims 90-93 drawn to digital audio rights management scheme where audio data is protected and limited to access using a public keys which is classified in class 705,subclass 51.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claims 1-89,96-109 drawn to a system for implementing PKI based encryption of content over an electronic network where encryption services component generates key pair and providing certificate management services and PKI server operable to function at least one of a certificate authority and as a LDAP service provider which is classified in class 380, subclass 282. Claims 90-93 drawn to digital audio rights management scheme where audio data is protected and limited to access using a public keys which is classified in class 705,subclass 51. The subcombinations are distinct from each other if they are shown to be

Art Unit: 2135

separately usable. In the instant case, invention claims 90-93, protection of digital rights access has separate utility such as, encryption of audio files such as MP3 prevents unauthorized downloading or unauthorized modification and unauthorized distribution so that creator or rightful ownership is protected against fraudulent use. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. These two separate classifications is an indication of burden on the examiner as reason stated above.

**Conclusion**

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hosuk Song whose telephone number is 703-305-0042. The examiner can normally be reached on Tue-Fri from 6:00 am to 4:00 pm.
